

PRO-STEP™

For the ultimate in consistently accurate holes in conduit trunking & sheet steel.

Conduit Installation Range

As the flagship products for Armeg's Conduit Installation Range, the **Pro-Step** and **Quick-Cone** represent the highest step in quality manufacturing.

Designed in a combination procedure using diamond ground technology together with a precision manufacturing process the drills produce rapid, clean and professional holes for quality conduit installation.

With a one piece HSS construction for extended tool life and neat burr-free holes, the **Pro-Step** and **Quick-Cone** are a must have for all electricians.

Pro-Step and Quick-Cone FEATURES & BENEFITS

- Precision ground non-slip point for easy, damage free drilling start-up.
- Ground Shank Profile, ensures drills are secure in the chuck for added user comfort.
- Quality manufacturing standards & tool design, gives multiple material drilling options.
- Pro-Step & Quick-Cone can also drill;
 - Sheet Steel
 - Non-ferrous metals
 - Plastics
 - Formica
 - Plywood

PRO-STEP

QUICK-CONE

Manufactured by

QUICK-CONE™

The most versatile tool for quick and easy holes in trunking & sheet steel.

The **Pro-Step**, featuring a stepped drilling profile, is the professional's solution for producing consistently accurate holes in trunking.

The **Quick-Cone**, with its uninterrupted ground cutting edges, is perfect for producing an infinite range of hole diameters, making it the most versatile tool for drilling holes and an ideal trade solution.
