

# Conduit Installation Range

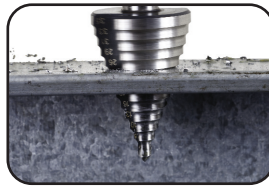

## The Solution to Conduit Installation

The new Conduit Installation Range, by Armeg, is the solution range for all Conduit and trunking applications.

Made in Sheffield to the highest step in precision quality manufacturing, the longer life tools produce a cleaner, more accurate finish for time-saving and cost-effective installation. Combining all the tools required for a professional and quality conduit installation, the range provides a hassle-free and easy tool selection; ensuring users always have the right tools for the right job.

# Conduit Installation Range

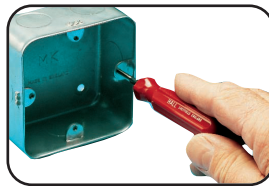

### PRO-STEP

For the ultimate in consistently accurate holes in trunking & sheet steel.

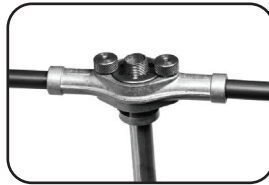

### QUICK-CONE

The most versatile tool for quick and easy holes in trunking & sheet steel.

### RE-THREADER

Quickly and cleanly rethreads for easy installation of back boxes.

### CONDUIT THREADING SET

Rapidly produces accurate threads for secure and professional conduit installation.

### CUTTING COMPOUND

Maintains sharpness and tool life. Always use when drilling with Armeg Pro-Step & Quick-Cone.
