

## Specials Manufacturing Service

Based in Sheffield England, Armeg's manufacturing reputation is well established. Since 1973 we have developed ourselves in to **The drill bit manufacturing specialists.**

However, it doesn't just stop at drill bits. If it isn't in the catalogue we will be pleased to **produce to your requirements.**

Our range of **made to order & bespoke items** covers a huge range of customer needs including:

Non standard drill bit sizes / Machine parts / Collets / Drive pins / Shank adaptors / Soil Augers / Stop drills / Plug drills / Threaded & hex shank tools / Hollow drills / Left hand spiral drills... and much more!!!

### Our on-site facility includes

- **Bespoke Manufacturing** - Products produced to you design / drawings / samples - just tell us what you need and we will produce from whatever you have.
- **Manufacturing Competencies** - With key manufacturing skills and machining capabilities such as turning, CNC machining, fluting, shanking, slotting, heat treatment & finishing we can manufacture a huge range of products to your needs on modern CNC driven machines.
- **Complete Service Flexibility** - We can produce in batches from one to one hundred thousand and can offer a range of quotes based on standard delivery or rapid response manufacture with products produced in a matter of days from drawing approval.

### Additional Service Options include

- **Design and Prototype Service** - Tell us what your problem is and we will work with you to design and produce a solution. Our CAD design development engineers can often take an idea to prototype sample in a matter of days.
- **Product Testing Service** - Let us test and refine your ideas and designs. Most test work can be completed in-house by **Technical Product Managers** to prove designs and establish typical performance expectations.

So it's not all about drill bits! - The **Armeg Specials Manufacturing Service** is exactly that. A manufacturing service to produce your products to your specifications.

For further details, a free of charge quotation or just to discuss a specific product, please contact us on the numbers shown below asking for Paul Bentley or Phil Gould, our Specials Team's chief Engineers.
