

Technical Data Sheet

Soft Tile Drill Bits

RECOMMENDED SPEED

Soft Tile Drills should be used on a fairly slow speed, typically 300-500r.p.m

MATERIAL RECOMMENDATIONS

Plaster-backed wall tiles	●
Ceramic	●
Natural Slate	●
Travertine	●
Marble	●
Granite	●
Quarry Tiles	●
Porcelain	<input type="checkbox"/>

Very suitable	●
Suitable	●
Suitable but better alternative	●
Not suitable	<input type="checkbox"/>

TECH TIP!

All our Soft Tile Drills are supplied as a 'start-up' pack, containing 2 x Soft Tile Drill bits, plus the equivalent sized masonry bit for drilling material behind the tile

TECHNICAL ICONS

No impact / percussion should be used

Use in a portable drilling machine

Use in a fixed drilling machine

When used with relevant adaptor and 3 jaw chuck. Do not use on impact
